## DORJES

Figure 1 displays four 3D bar charts, each representing a different scenario or time period. The vertical axis for all charts is labeled 'CARGAS' and is marked with a '#' symbol. The horizontal axis represents different categories, also marked with a '#' symbol. The data is visualized using small cubes to represent the volume of cargo for each category.

- Top Chart:** Shows a distribution where the first category has the highest volume, followed by the second and third categories, with the fourth category having the lowest volume.
- Second Chart:** Shows a more balanced distribution across the four categories, with the first category still being the highest.
- Third Chart:** Shows a distribution where the first category is significantly higher than the others, which are relatively low and similar to each other.
- Bottom Chart:** Shows a distribution where the first category is the highest, followed by the second category, with the third and fourth categories being the lowest.
